

## Town of Calmar Economic Development Officer Job Posting

**Shape the future.** A pretty bold first three words to describe your role as an Economic Development Officer with the Town of Calmar. Let's add more: independent, entrepreneurial, self-confident, energetic, visionary, a relationship builder...someone who likes to out-do vs out-talk.

We need you to be the energy that drives an ambitious vision we are working toward: Home is where the heart is in Calmar – as the Edmonton region's most affordable community. Connected to the earth in what we sow and grow. Connected to the neighbours you know. Pursuing an energized downtown, imaginative new housing options, and new types of spaces and places for entrepreneurs to grow their craft.

You have 4-7 years of economic development experience.... working with the typical elements that define the profession: investment attraction, business attraction, tourism growth, and investment readiness focused policy advisory. But wait...there's more: we have new Recreation, Downtown, Community Direction, Economic Development, and Communications Plans, and a new brand to sink your project implementation teeth into.

With best-in-region affordability in a community committed to connection to people, place and legacy-building, there's breathing room in Calmar for you to stretch your wings and work to your heart's content.

To learn more about this opportunity and/or apply, reach out to the CAO. This opportunity will remain open until we find the right candidate.
